PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience, focused on building applied AI systems (LLMs) on a solid backend foundation. I design LLM-powered applications —agents, RAG, Text-to-SQL— by orchestrating foundation models (AWS Bedrock, OpenAI, Gemini) through serverless services and REST APIs. Architected and built the first production version of a graph-based Text-to-SQL AI agent using LangGraph and AWS Bedrock. Strong technical base in Python, FastAPI, NestJS and PostgreSQL, with hands-on experience in serverless infrastructure on AWS (Lambda, Step Functions) and Terraform. Strong interest in the mathematical foundations of information retrieval and AI system evaluation.

TECHNICAL SKILLS

AI & LLMs: LangGraph, LangChain, AWS Bedrock, LLM API integration (OpenAI, Gemini), AI Agents (Text-to-SQL / SQL Agents), Retrieval-Augmented Generation (RAG), Embeddings, Prompt Engineering, information retrieval fundamentals (BM25, TF-IDF, cosine similarity)

Backend: Python, FastAPI, Django, TypeScript, JavaScript, Node.js, NestJS, Express, Prisma ORM, REST APIs, Microservices

Cloud & Infrastructure: AWS (Lambda, Step Functions, S3, CloudWatch), Terraform, Docker, CI/CD Pipelines, Google Cloud Platform (GCP), Linux, Git

Databases: PostgreSQL, MySQL, SQL Server, query optimization, data modeling

Other: Angular, React, Flutter (Android/iOS), PHP (Laravel/Lumen)

WORK EXPERIENCE

AI Engineer | Backend

Münster Mind Latinoamérica | Quito, Ecuador (Hybrid) | Jul 2024 – Present

- Architected and built the first production version of a graph-based Text-to-SQL AI agent using **LangGraph** and **AWS Bedrock**, integrated with a **FastAPI** backend, automating a large share of previously manual SQL query creation.
- Developed serverless backend services on **AWS Lambda** that orchestrate LLM provider APIs (AWS Bedrock, OpenAI, Gemini) and expose them through REST APIs consumed by the web (Angular) and mobile (Flutter) applications.
- Built and maintained serverless backend services with AWS Lambda and Step Functions using NestJS and Prisma ORM, serving both the mobile application and the web platform.
- Developed and shipped a cross-platform mobile application with Flutter for Android and iOS, managing the full release cycle on Google Play Store and Apple App Store.
- Deployed cloud infrastructure with Terraform (Lambda, S3, Step Functions) and implemented CI/CD pipelines with monitoring on Amazon CloudWatch and Google Cloud Platform.

Backend Developer (Freelance, part-time)

Billusos | Remote | Dec 2023 – Nov 2024

- Developed and optimized backend services in Python and Django for automated generation of financial reports and operational dashboards, eliminating manual processes and accelerating delivery of business information.
- Built and maintained mobile application features with React Native, ensuring seamless integration with REST API endpoints and server-side business logic.
- Managed the data persistence layer and optimized complex PostgreSQL queries for business intelligence reporting, improving dashboard response times.

Software Engineer

Centro Ecuatoriano de Eficiencia de Recursos (CEER) | Quito, Ecuador | Feb 2023 – Jul 2023

- Developed dynamic reports and interactive dashboards with optimized PostgreSQL queries for the CONAFIPS SARAS financial platform, improving data retrieval performance.
- Implemented full-stack features with PHP (Laravel/Lumen) on the backend and Angular on the frontend, ensuring accurate real-time representation of financial metrics.

- Integrated data processing pipelines ensuring compliance with financial business logic and regulatory requirements.

EDUCATION

B.Eng. in Computer Science | Expected graduation: 2027

Escuela Politécnica Nacional (EPN) – Quito, Ecuador

Associate Degree in Software Development | Graduated: 2023

Escuela Politécnica Nacional (EPN) – Quito, Ecuador

CERTIFICATIONS

- Advanced English – B2 Level – CEC-EPN (2026)
- Backend Development with Python, FastAPI and Angular 17 – Platzi (2024)
- Network Defense Essentials (NDE) – EC-Council (2026)
- Web Analytics and Java Standard Programming – Fundación Telefónica (2022)

LANGUAGES

Spanish: Native | **English:** Upper-Intermediate (B2)
