---

### PROFESSIONAL SUMMARY

Software developer with hands-on experience since April 2022, including internships, a fixed-term contract, and part-time freelance work. I build APIs and web and mobile products with Python, NestJS, Angular, and AWS, and integrate language models through backend services. I am developing a specialization in AI security engineering and cloud architecture, supported by personal projects in RAG and information retrieval.

### PROFESSIONAL EXPERIENCE

#### Software Developer | Backend and applied AI

Münster Mind Latinoamérica · Quito | Jun 2024 – Present

- Built and maintained AWS Lambda services and REST APIs powering features in Angular and Flutter applications.
- Integrated language models through server-side services using AWS Bedrock and the OpenAI, Anthropic, and Gemini APIs.
- Developed backend features in Python and NestJS, orchestrated processes with AWS Step Functions, and worked with data through Prisma ORM.
- Contributed to Terraform infrastructure and CI/CD deployments; monitored services with Amazon CloudWatch.
- Developed and published a cross-platform Flutter application on Google Play and the App Store.

#### Backend Developer | Part-time freelance

Billusos · Remote | Dec 2023 – Nov 2024

- Built Python and Django services that generate financial reports and support operational dashboards.
- Connected React Native features to REST APIs and worked on PostgreSQL queries for reporting.

#### Full Stack Developer | Fixed-term contract

Centro Ecuatoriano de Eficiencia de Recursos · CONAFIPS SARAS | Jan 2023 – Jun 2023

- Built screens and features for the SARAS platform using PHP/Laravel and Angular.
- Wrote database queries and scripts to support data management and platform reporting.

#### Frontend Development Intern

Latin Trails · Quito | Sep 2022 – Dec 2022

- Updated the company website with Nuxt and Vue and prepared coordinates, images, and descriptions for interactive maps.

#### Systems Intern

Información Tecnológica del Ecuador S.A. · Quito | Apr 2022 – Aug 2022

- Updated software documentation, configured internal tools, and contributed to an auxiliary application for the CG/Web system.

## SELECTED PROJECTS

### OffHouse | Peer-to-peer marketplace backend

Graduation project · PHP / Laravel

Built the backend for a peer-to-peer marketplace, including a REST API, token-based authentication, and endpoints to publish, view, and manage products.

### PDF question answering with RAG | Reproducible demo

Personal project · Python / LangChain / OpenAI

Built a demo that loads a PDF, splits it into chunks, generates embeddings, retrieves relevant context, and answers questions in the console. I have also started a project with LangGraph.

## TECHNICAL SKILLS

**Backend and applications:** Python, Django, FastAPI, TypeScript, NestJS, Angular, PHP, Laravel, Flutter, React Native, REST APIs.

**Cloud and data:** AWS Lambda, Step Functions, S3, CloudWatch, Terraform, Docker, CI/CD, PostgreSQL, MySQL, Prisma ORM.

**Applied AI:** Model integration through AWS Bedrock, OpenAI, Anthropic, and Gemini; RAG with LangChain; early-stage LangGraph project.

## EDUCATION

### BSc in Computer Science | In progress

Escuela Politécnica Nacional · expected graduation 2027

### Higher Technical Degree in Software Development

Escuela Politécnica Nacional · 2023

## LANGUAGES AND CERTIFICATION

Native Spanish · Intermediate English (B1)

Network Defense Essentials · EC-Council, 2026

## TECHNICAL COMMUNITY

Presented technical talks at AWS Community Day Ecuador 2026 and GDG Quito. I publish technical content at migueldev11.com.
